Overview

Covenant Integration Services is managed by an experienced, highly motivated and knowledgeable core group of experienced individuals. Our staff has a strong ethical base that is inherent in all of our business practices. Covenant provides integration services in the commercial, governmental, and industrial sectors. We provide creative problem solving capabilities and a commitment to quality service and customer satisfaction on projects. We specialize in building secure facilities for data centers, command and control, Sensitive Compartmented Information Facilities, or any other mission critical room or building that requires a hermetically sealed and secure facility.

Our integration services include HVAC, electric, power distribution, plumbing, fire detection and suppression systems, CCTV, access control, intrusion detection, mass notification, perimeter screening, barriers, gate controls and visitor management systems.

Through our partnership we are able to design and install underground duct bank and manhole systems for telecommunications and electric power projects. Services include project estimating, pre-construction engineering, system design and documentation, permitting, traffic control plans, construction, and maintenance. Telecommunications and power transmission system installation project management, inspection services, and troubleshooting. Covenant designs, installs, and maintains fiber optic and cable networks for both indoor and outdoor applications. We have the flexibility and capacity to manage projects from \$5,000 to \$10 million in size.
